- Suitable for rotary & Dual Action polishers

Heavy Cut

P1500 ÷ P2000

DEEP SCRATCHES REMOVAL

Medium Cut

P2000 ÷ P2500

MODERATE DEFECTS REMOVAL

Perfect Finish

HIGH-GLOSS FINISH

REMOVAL OF HOLOGRAMS AND FINE SCRATCHES (>P3000)

POLISHING COMPOUND

Heavy Cut

Innovative polishing compound with high cutting power, ideal for removing deep scratches and P1500 grit sanding marks. The water-based formula with aluminium oxide provides excellent cutting properties and does not generate a large amount of dust

- Quickly removes P1500 grit sand scratches.
- Does not contain fillers, silicone or waxes.
- Suitable for use with rotary and Dual Action machines.
- Applicable on both fresh and fully polymerized paints.

Processing: manual work, mechanical work (rotary, Dual Action)

Polishing pads: hard polishing foam (yellow), yellow lambswool, white lambswool, orange peel removal pads: „jeans“, „corduroy“

POLISHING COMPOUND

Medium Cut

High-quality polishing compound with medium cutting power. Designed to remove medium scratches and P2000 grit sanding marks. Provides effective removal of imperfections while giving the surface a high gloss finish.

- Removes P2000 grit sand traces.
- Does not contain fillers, silicone or waxes.
- Suitable for use with rotary and Dual Action machines.
- Applicable on both fresh and fully polymerized paints.

Processing: manual work, mechanical work (rotary, Dual Action)

Polishing pads: soft polishing foam (grey), yellow lambswool, white lambswool, orange peel removal pads: „jeans“, „corduroy“
